Betsy,

Here are some great pictures. I'll work on a more formal follow-up report but wanted to pass these along.

Mike,

As per our discussion last night, the wild Alaskan fell to her final resting spot at 2100 7/8/2021. The coordinates where 57.00.074 N / 150.47.781 W. The depth read 980 fathoms. There where no marine mammals spotted at this location during the operation. There was no visible sheen. The flotsam was minimal and non recoverable. After the vessel was submerged, USCG Sector Anchorage was notified via sat phone. The coordinates where relayed, and the Makushin Bay departed for Kodiak Harbor.

Please let me know if any further info is needed in this regard.
